### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: This application teaches a black ink composition comprising a water soluble dye containing a single compound showing an absorption maximum at 440 to 540 nm with a half-value width of 90 nm to 200 nm for a visible region absorption spectrum in water, wherein the single compound has from 4 to 6 azo groups in one molecule. The closest prior art of record is US Patent No. 7,048,790, issued to Taguchi et al., which teaches an inkjet black ink composition comprising an aqueous medium having dissolved therein at least a first azo dye of the formula BL-1 or BL-2 (see Formulation of Black Ink Bk-101) having a  $\lambda_{max}$  of 500-700nm and a half-value width of 100 nm or more in the absorption spectrum of a dilute solution standardized to an absorbance of 1.0 and at least a second azo dye of the formula BS-1 or BS-2 (see Formulation of Black Ink Bk-101) having a  $\lambda_{max}$  of 350-500nm but fails to teach or fairly suggest that either of the above azo dyes has from 4 to 6 azo groups as claimed by applicants. Since the only rejections remaining in this application are provisional obviousness-type double patenting rejections over copending Application No. 11/631,942 (US 2008/0043078) and copending Application No. 11/632,653 (US 2008/0043079), the examiner is withdrawing these rejections and passing this application to issue as per MPEP 804.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
